The map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Dominion Energy provides the reliable, affordable, and increasingly clean energy that powers your every day. Once complete in late 2026, CVOW will consist of 176 turbines that will generate enough renewable energy to power up to 660,000 homes. CVOW is expected to save up to \$3 billion in fuel savings for customers in the first 10 years of operation.

Dominion Energy continues to build the onshore electric transmission infrastructure necessary to deliver the reliable, affordable, and increasingly clean energy that will be generated by CVOW. The project currently under construction remains on time and on budget.

If you have questions about work occurring in your neighborhood, we encourage you to stop by our next public office hours for individual assistance. You can learn about methods we are using to mitigate potential impacts to neighbors during both overhead and underground construction. We will also be available to answer your questions about the remaining construction schedule.

Thursday, October 24, 2024 | 10:00 a.m. - 6:00 p.m.
Virginia Beach Field House, Blue Room
2020 Landstown Centre Way, Virginia Beach, VA 23456

Enter the facility through the front door. Go past the Grille on the field side to the Blue Room.

Thank you for your patience during construction activities in the Cities of Chesapeake and Virginia Beach. Please do not hesitate to contact us if you have questions or additional feedback.
