Dominion Energy is developing the Coastal Virginia Offshore Wind (CVOW) project, consisting of 176 wind turbines 27 miles off the coast of Virginia Beach.

Once operational, CVOW will generate enough clean, renewable energy to power up to 660,000 homes and businesses while attracting economic development for the region, creating over a thousand jobs and millions of dollars in local and state tax revenues.

To reliably deliver the clean, renewable energy generated by CVOW to our customers, this project will include new electric transmission infrastructure in Virginia Beach and Chesapeake.

Pending final regulatory approvals, preconstruction of this onshore infrastructure could begin as early as November. In preparation of this work, we would like to invite you to the open house below to learn about our planned activities in your neighborhood, ask questions and discuss next steps.

The map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Wednesday, October 4, 2023 | 4:00 p.m. – 7:00 p.m.

Mt. Pleasant Christian School, 1613 Mt. Pleasant Road, Chesapeake, VA 23322

Visit us anytime during the open house. There is no formal presentation.

We are committed to working safely and respectfully and limiting disruptions within the communities we serve.
